want 5000 Members.

The object of the six slav campaign is to increase the membership of the local chapter from 640 to 5000. It is expected that considerably more than that num-ber of members will be obtained by the campaigners during the week. If El Paso exceeds the 5000 membership mark, it will average better than other mark, it will average better than other cities in the country. The local campaign is a part of a general membership campaign for the American Red Cross throughout the country, designed to increase the membership of the society to 1,000,000, so that it may be ready to aid if called upon in time of war.

Brown, clairman of the local chapter, "that one of the most important features of the work is to solicit the neighborhood in which they live. A great many have already taken memberships from their neighbors who have not belonged to any of the committees. I would not have the women overlook this very important feature of the work because they will be able to get from 10 to 20 members in their immediate neighborhoods, and it will be much easier for them than depending on getting all of them down town.

One Worker Brings in 23.

"If each of the 250 workers during the week's campaign set out to secure even 25 members, the total memberships, at 31 each, and three sustaining memberships and on any special duty, it seems that this task would require but little patrictism."
